

## BAYERO UNIVERSITY, KANO

# FACULTY OF COMPUTER SCIENCE AND INFORMATION HELDING

### DEPARTMENT OF COMPUTER SCIENCE

2020/2021 First Semester Examinations

MTH2301 - Mathematical Methods

instructione Allowed: 3 Hoursquestions

Instruction: Answer any five (5) questions

1. (a) Find for  $F(x,y) = 2x + y^2$  (i)  $\int_C F(x,y) dx$  (ii)  $\int_C F(x,y) dy$  (iii)  $\int_C F(x,y) ds$  where C is the line y = 2x starting from x = 0, y = 0 and ending at  $x = \ln y = 2x$  starting from x = 0, y = 0

(b) From your results in (a) above, Is  $\int_C F(x,y) dx = \int_C F(x,y) dy = \int_C F(x,y) ds$  (a) above,  $\int_C F(x,y) ds$ 

2. (a) Use Maclaurin series to evaluate  $\lim_{x\to 0} \frac{e^x - 1 - x}{x^2}$  2. (a) Use Maclaurin series to evaluate  $\lim_{x\to 0} \frac{e^x - 1 - x}{x^2}$ 

(b) if  $F(x,y) = Ln\sqrt{x^2 + y^2}$ , show that  $x\frac{\delta F}{\delta x} + y\frac{\delta f}{\delta y} = 1$  (b) if  $F(x,y) = Ln\sqrt{x^2 + y^2}$ , show that  $x = \frac{1}{2}$ 

3. (a) if  $F(x,y) = x^2 - y^2$ ,  $x = s \cos t$ ,  $y = s \sin t$ , find  $\frac{\delta F}{\delta s}$  and  $\frac{\delta F}{\delta t}(x,y) = x^2 - y^2$ ,  $x = s \cos t$ ,  $y = s \sin t$ 

(b) Find the increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and total differential if  $F(x,y) = x^3 y(y)$  runs one increment and  $F(x,y) = x^3 y(y)$  runs one inc

1 (a) Evaluate lim  $\frac{\sqrt{2}+x}{\sqrt{2}}$ . 4. (a) Evaluate  $\lim_{x\to 0} \frac{\sqrt{2+x}-\sqrt{2}}{x}$ 

(b) Does the  $\lim_{x\to 4} f(x)$  exist? Where  $f(x) = \begin{cases} 4x+3, & x<4\\ 3x+7, & x\geq 4 \end{cases}$  (b) Does the lim f(x) exist? Where  $f(x) = \begin{cases} 4x+3, & x<4\\ 3x+7, & x\geq 4 \end{cases}$ 

(c) if  $y = e^{2x}$ , evaluate  $\frac{d^2y}{dx^2} - 3\frac{dy}{dx} + 2y$  from (c) if  $y = e^{2x}$ , evaluate  $\frac{d^2y}{dx^2} - 3\frac{dy}{dx} + 2y$ 

5. (a) Use Lagrange multipliers to find the global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z ine global maximum and minimum of F(x,y) = x + y + 2z in a global maximum and minimum of F(x,y) = x + y + 2z in a global maximum and minimum of F(x,y) = x + y + 2z in a global maximum and minimum of F(x,y) = x + y + 2z in a global maximum and minimum of F(x,y) = x + y + 2z in a global maximum and F(x,y) = x + y + 2z in a global maximum and F(x,y) = x + y + 2z in a global maximum and F(x,y) = x + 2z in a on the surface  $x^2 + y^2 + z^2 = 3$ 

(b) find  $\frac{dy}{dx}$  the point (2,1) from  $x^3 + 3xy^2 + y^2 = 21$  (b) find  $\frac{dy}{dx}$  the point (2,1) from  $x^3 + 3xy^2 + y^2$ 

6. (a) If  $F(x,y) = y \sin x - x \sin y$  verify that  $F_{xyy}$ ,  $F_{yxy}$  and  $F_{yyx}$  are equal.  $y \sin x - x \sin y$  verify that  $F_{xyy}$ 

(b) Show that

(i)  $f(x) = \frac{1}{2}x - \sqrt{x}$  satisfies the hypothesis of Rolle's theorem on [0,4] and find the all values of c in (0,4) that satisfy the conclusion of the theorem, alone of c in (0,1) that satisfy the conclusion

(ii)  $f(x) = \sqrt{25 - x^2}$  satisfies the hypothesis of Mean value theorem) on [25,3] and find the hypothesis all values of c in (-5,3) that satisfy the conclusion of the theorem tues of c in (-5,3) that satisfy the conclusion

7. Evaluate the following integrals

7. Evaluate the following integrals

(a)  $\iint (1+(x-1)^2) dxdy$  where C is the region starting from |x| = 0, y = 0 and ending at is the region x = 2, y = 3

(b) 
$$\iint_{0}^{1} \iint_{0}^{3} \left( x^{2} + y^{2} - z^{2} \right) dz dy dx$$

### BAYERO UNIVERSITY, KANO FACULTY OF COMPUTER SCIENCE AND INFORMATION TECHNOLOGY DEPARTMENT OF INFORMATION TECHNOLOGY

2018/2019 Academic Session - First Semester Examinations ITC2203: Introduction to Information Technology in Business

Instructions: Attempt 4 Questions

Time Allowed: 2-Hour

- a) Define the term e-commerce. [3 Marks]
  - Briefly explain all the types of e-commerce. [10 Marks]
  - c) Briefly Explain vertical market and horizontal market [4.5 Marks]
- a) Define Supply Chain Management (SCM). [4 Marks]
  - b) Briefly explain the three main flows in SCM. [9 Marks] PIF
  - c) Briefly explain e-market [4.5 Marks]
- 3. a) Define the term internet economy. [4 Marks]
  - b) Differentiate between e-business and internet economy. [4.5 Marks]
  - c) Briefly explain the three major segments of internet economy. [9 Marks]
- With the aid of diagram explain an old economy relationship and new economy relationship. [8 Marks]
  - b) Explain the advantages of new economy relationship over old economy relationship.
  - c) Briefly explain the two primary components of B2B e-commerce. [3.5 Marks]
- 5. a) What are major forces that are fueling e-commerce? [9 Marks]
  - b) Explain the importance of intranet to e-commerce. [2.5 Marks]
  - c) Explain data transaction security components. [6 Marks]
  - 6. a) Briefly explain three authorization schemes. [6 Marks]
    - b) Explain all types of data flow and give an example of each. [6 Marks]
    - c) Assume n devices are connected using mesh topology, what is the number of cable links
      - i) Using half duplex. [3 Marks]
      - fi) Using full duplex. [2.5 Marks]
